ACCELERATING BUSINESS

TASK

Implement the page for the link shared here @
https://www.figma.com/file/N0Tv7yYLf3kfMLQjUncUlx/Design-Task---
PLP?type=design&node-id=0-1&mode=design&t=mEpvVYQ7GInQPxXk-0

THINGS TO DO

1. Implement the code using HTML & CSS
2. Develop the functional page in React.JS using the next.js framework / Angular.JS or Vue.JS using the nuxt.js framework.
3. We would like to see if you are aware of Server Side Rendering (SSR) and if you can use the same on your demo.
4. Page has to be responsive for mobile & tablet
5. We will evaluate you for the following:
    a. Code structure
    b. Naming convention
    c. Use of minimum pre-built JS packages
    d. Screen size fit
    e. Min DOM size
6. SEO settings:
    a. Page title
    b. Page description
    c. Setting of H1&H2 tags
    d. Schema settings
    e. Use of images with appropriate seo friendly names
    f. Use of alt text on images
7. Page needs to be hosted on a public service like @ https://www.netlify.com/ and shareable so we can evaluate it
8. Code has to be checked into a public github repository , repo has to be named as follows - Appscrip-task-"candidate name"
9. If you can build the front end content using some mock api , maybe using this @ **https://fakestoreapi.com/** , **would be great but we are also OK to evaluate you without it if you are unable to do so.**

"We believe you have great potential. All the Best!!"
